Girmachew Samson

Atlanta, GA | 404-729-9321 | gimmys943@gmail.com | gimmy-samson.com | linkedin.com/in/girmachew-samson | GitHub

Education

Georgia Institute of Technology — Atlanta, GA
B.S. in Computer Science — *Expected May 2030*

- **Awards**: LinkedIn Possibilities in Tech Scholar, Teamsters Scholarship Fund Recipient

Experience

LegiCycle — Aug. 2026 – Present
Full Stack Engineer — *Atlanta, GA*

- Audit a live platform on AWS against NIST 800-53 and OWASP standards, identifying and closing 30+ high-severity vulnerabilities
- Migrate hardcoded secrets into Doppler across Dockerized services, closing the largest standing exposure of user data
- Expand the platform's RAG research assistant, backed by PostgreSQL and Redis, from Georgia-only to Georgia, Delaware, and federal law, fixing a bug that cited the wrong state's laws to users
- Fix a bug across 29 Django/DRF routes that silently locked invited collaborators out of shared bill-drafting projects, restoring access to every affected project

Handshake — June 2026 – July 2026
AI Trainer & Evaluator — *Remote*

- Evaluated and refined AI-generated code in Python, JavaScript, TypeScript, and Java against structured rubrics over 50+ contracted hours
- Authored and scored prompts across categories for large-scale model training pipelines, including OpenAI's Codex

Sonaara — Aug. 2025 – Dec. 2025
Software Engineer Intern — *Atlanta, GA*

- Shipped React Native features to a production mobile app serving 600+ users, improving load performance by 22% via lazy loading and component optimization
- Integrated an identity-verification API (TruFace/Persona) to onboard 90+ verified users, replacing manual ID review with automated facial matching
- Architected the backend schema for a real-time messaging feature, contributing to a 73% userbase increase

Projects

Google Tasks MCP Server | GitHub — Aug. 2026 – Sep. 2026

- Built an open-source MCP server in TypeScript that gives Claude, Cursor, and other AI clients read/write access to Google Tasks; published to npm and the official MCP Registry
- Shipped 14 tools over the Google Tasks API behind an OAuth 2.0 flow that keeps credentials on the user's machine, with releases automated via GitHub Actions

Agent Opportunity Tracker | GitHub — Aug. 2026

- Built a self-hosted Next.js and Supabase app that tracks internship applications and exposes them to AI agents over a token-authenticated API
- Added a scheduled pipeline that sweeps application email and scores each posting against the resume with the OpenAI API, then drafts tailored resumes on request

Bantr | Link — Feb. 2026 – Present

- Founded and built a live debate platform end-to-end (Next.js, TypeScript, Supabase) with LiveKit audio rooms, scaling to 250+ users in open beta
- Built a Redis-backed rate limiter with 9 per-endpoint tiers across 38 API routes, auto-blocking abusive IPs after 10 violations to keep chat, polling, and auth spam-free

Technical Skills

Languages: Python, TypeScript, JavaScript, Java, SQL
Frameworks & Tools: React, React Native, Next.js, Node.js, Django/DRF, PostgreSQL, Redis, Supabase
Cloud & Infrastructure: AWS (ECS, Cognito, RDS), Terraform, Docker, Doppler, Vercel
AI/ML & Security: Claude API, OpenAI API, RAG, Model Context Protocol, NIST 800-53, OWASP
