Education

Georgia Institute of Technology Atlanta, GA

B.S. in Computer Science, GPA: 4.00/4.00 *Expected May 2030*

- **Awards**: LinkedIn Possibilities in Tech Scholar, Teamsters Scholarship Fund Recipient

Experience

LegiCycle Aug. 2026 – Present

Full Stack Engineer *Atlanta, GA*

- Hardened a live platform serving 20+ clients on AWS against NIST 800-53 and OWASP standards, identifying and remediating 30+ high-severity vulnerabilities
- Expanded the platform's RAG research assistant, backed by PostgreSQL and Redis, from Georgia-only coverage to Georgia, Delaware, and federal law
- Diagnosed and resolved a bug across 29 Django/DRF routes that silently locked invited collaborators out of shared bill-drafting projects, restoring access across all 20+ client accounts

Handshake June 2026 – July 2026

AI Trainer & Evaluator *Remote*

- Evaluated and refined AI-generated code in Python, JavaScript, TypeScript, and Java against structured rubrics over 50+ contracted hours
- Authored and scored 45+ prompts for large-scale model training pipelines, including OpenAI's Codex

Sonaara Aug. 2025 – Dec. 2025

Software Engineer Intern *Atlanta, GA*

- Shipped identity-verification and messaging features to a production React Native app serving 600+ users, improving load performance by 22% via lazy loading and component optimization
- Integrated an identity-verification API (TruFace) to onboard 90+ verified users, replacing manual ID review with automated facial matching that cut 8 minutes from each verification
- Architected the Firebase backend schema for a real-time messaging feature, contributing to a 73% userbase increase over 3 months

Projects

Google Tasks MCP Server | GitHub Aug. 2026 – Sep. 2026

- Built an open-source MCP server in TypeScript that gives Claude, Cursor, and other AI clients read/write access to Google Tasks; published to npm and the official MCP Registry
- Shipped 14 tools over the Google Tasks API behind an OAuth 2.0 flow that keeps credentials on the user's machine, with releases automated via GitHub Actions

Agent Opportunity Tracker | GitHub Aug. 2026

- Built a self-hosted Next.js and Supabase app that tracks 50+ internship applications and exposes them to AI agents over a token-authenticated API
- Added a scheduled pipeline that sweeps application email and scores each posting against the resume with the OpenAI API, then drafts tailored resumes on request

Bantr | Link Feb. 2026 – June 2026

- Founded and built a live debate platform end-to-end (Next.js, TypeScript, Supabase) with LiveKit audio rooms, scaling to 250+ users in open beta
- Built a Redis-backed rate limiter with 9 per-endpoint tiers across 38 API routes, auto-blocking abusive IPs after 10 violations to keep chat, polling, and auth spam-free

Technical Skills

Languages: Python, TypeScript, JavaScript, Java
Frameworks & Tools: React, React Native, Next.js, Node.js, Django/DRF, PostgreSQL, Redis, Supabase
Cloud & Infrastructure: AWS (ECS, Cognito, RDS), Terraform, Docker, Doppler, Vercel
AI/ML & Security: Claude API, OpenAI API, RAG, Model Context Protocol, NIST 800-53, OWASP
